RURAL LIVING SKILLS APPRENTICESHIP-STYLE COURSE

for Permaculture Design Graduates

This will be an opportunity for Permaculture Design certificate graduates to advance their design skills under experienced guidance, implement some of their own designs on the land, and possibly in the wider community of Golden Bay.

On a daily hands-on way, participants will learn skills in organic gardening, orcharding, animal husbandry, rural land management, and community development – whilst living and learning in a 26 year old intentional community (40 residents).

A similar course (of 3 months) was piloted at Riverside Community, Motueka, in Spring last year. We learned such a lot from doing it and we at Tui are planning to do our version here, likely at the tail-end of Spring this year for 6 weeks, and again for 3 months late summer and autumn. Details still being worked out.

Further info about both of these courses should be available at end of June 2010.
